

# OneLeg<sup>®</sup> stool

The OneLeg<sup>®</sup> is a fantastic and ergonomic stool which provides dynamic and active sitting. Being able to rock and turn as you sit improves your posture and body awareness while developing core strength. This alternative method of seating can be utilised in the classroom (from early years upwards), the office and even the garden.

All stools are supplied with a black anti-slip foot cover as standard. The cover prevents the stool from sliding and protects your floor.

Anti-slip seat covers can be purchased as an optional extra. They provide greater comfort and make you feel secure.

- New active sitting
- Improve posture
- Develop core strength
- Tested to 200kg
